Our promise to you...

At Store First we strive to be customer champions, and to be the only option when customers are looking into storage.

We know that shopping around for storage can be time consuming, and often a bit of a minefield. That's why we don't just offer industry leading facilities, we make our prices simple, honest and easy to understand. At Store First we pride ourselves on the following:

- All customers receive a fob when signing up, meaning they can access their goods 24 hours a day, free of charge, at a time to suit them.
- We always offer our customers the best price and deal, first time around, rather than trying to charge higher rates only to renegotiate and price match.
- All prices that we quote are inclusive of what you need to pay - including contents protection (up to £10,000) and a free padlock. No nasty surprises on the day you come to move in.
- At Store First we don't ask for a security deposit to store with us, ensuring we keep your initial move-in cost down.
- We offer totally free pick ups to help customers with the moving process - please contact your local store for further details.
- All our facilities, including Wi-Fi, boardroom/meeting rooms, delivery acceptance, collection and forklifting are included within the price you pay.
- We know that plans change and to make your life as simple as possible we require no notice to vacate your unit.

We offer all in one quotations and don't charge you a deposit, nor require you to give notice to vacate!

- **We offer 50% discounts** to all new customers for the first 12 weeks of storage.
- **20% discount** when you pay for 26 weeks upfront, after your initial 12 weeks.

Your storage fee includes everything you need to pay to store with us, including your own free padlock for your unit and **up to £10,000 contents protection for your goods**. No hidden fees!

Use our Price Calculator on the website to find the sizes and prices at your local Store First store. For a detailed quote please contact your local Store First store, which can be found on pages 10 and 11.

Personal & Student Storage

Whether you are moving home, moving abroad, having building work done, a student needing to stash your stuff during university holidays or just need some extra space, Store First has everything covered for your personal storage needs. With flexible deals, long term discounts and industry leading storage facilities, everything is taken care of.

Need help moving your items? Contact your local self storage centre to enquire about our free pick up service. With no security deposit to pay and no notice to give prior to moving out, you have total control of your account.

Security is at the very heart of everything we do at Store First. You can relax knowing that with sole access to your goods, total storage area CCTV coverage, and state of the art intruder alarms, your goods are as safe as they can be.

Although all our sites are manned 7 days a week, we appreciate that you may need to access your unit 24 hours a day. At Store First, 24-hour access to your storage space is available to all customers at all sites.

Please visit the location page of your nearest store at storefirst.com to see our storage facilities on offer.

Business Storage

At Store First we want your business to work and this is how we can help.

- Mail and Delivery handling - The store team will sign for deliveries and inform you of their arrival, stores are also able to facilitate the process of collection.
- 24-hour access - You have access to the storage area 24-hours a day via fob entry, meaning it doesn't matter when we start you are always ready to start.
- Forklift - All sites have a forklift truck meaning we are able to take delivery of palletised stock on your behalf.
- Meeting rooms - All our storage centres have meeting rooms which our storage customers can book free of charge.
- Breakout area - All stores have a communal area with free Wi-Fi for customers to use.
- Kitchen - All stores have a kitchen facility available for customers to make tea/coffee/lunch.
- Wi-Fi - We have free Wi-Fi in the communal areas where you can sit down and do a little work on your laptop on-site.
- Security - We take security very seriously at Store First, we have invested heavily in the latest CCTV and monitored intruder alarms.
- Free marketing.

Storage Tips

Packing and storing efficiently for self storage.

Step 1

Plan what you will store.

- Start by identifying items that will be packed in boxes and stacked.
- Prioritise boxed items you will want to access most frequently (they'll go closer to the front of the unit).
- Group by fragility or weight - heavier, sturdier items should be stored on the bottom of stacked items, fragile items on top.
- Consider awkwardly-sized items that won't stack well, including how often you will need to use them, and how heavy they are.

storefirst.comTM
self storage

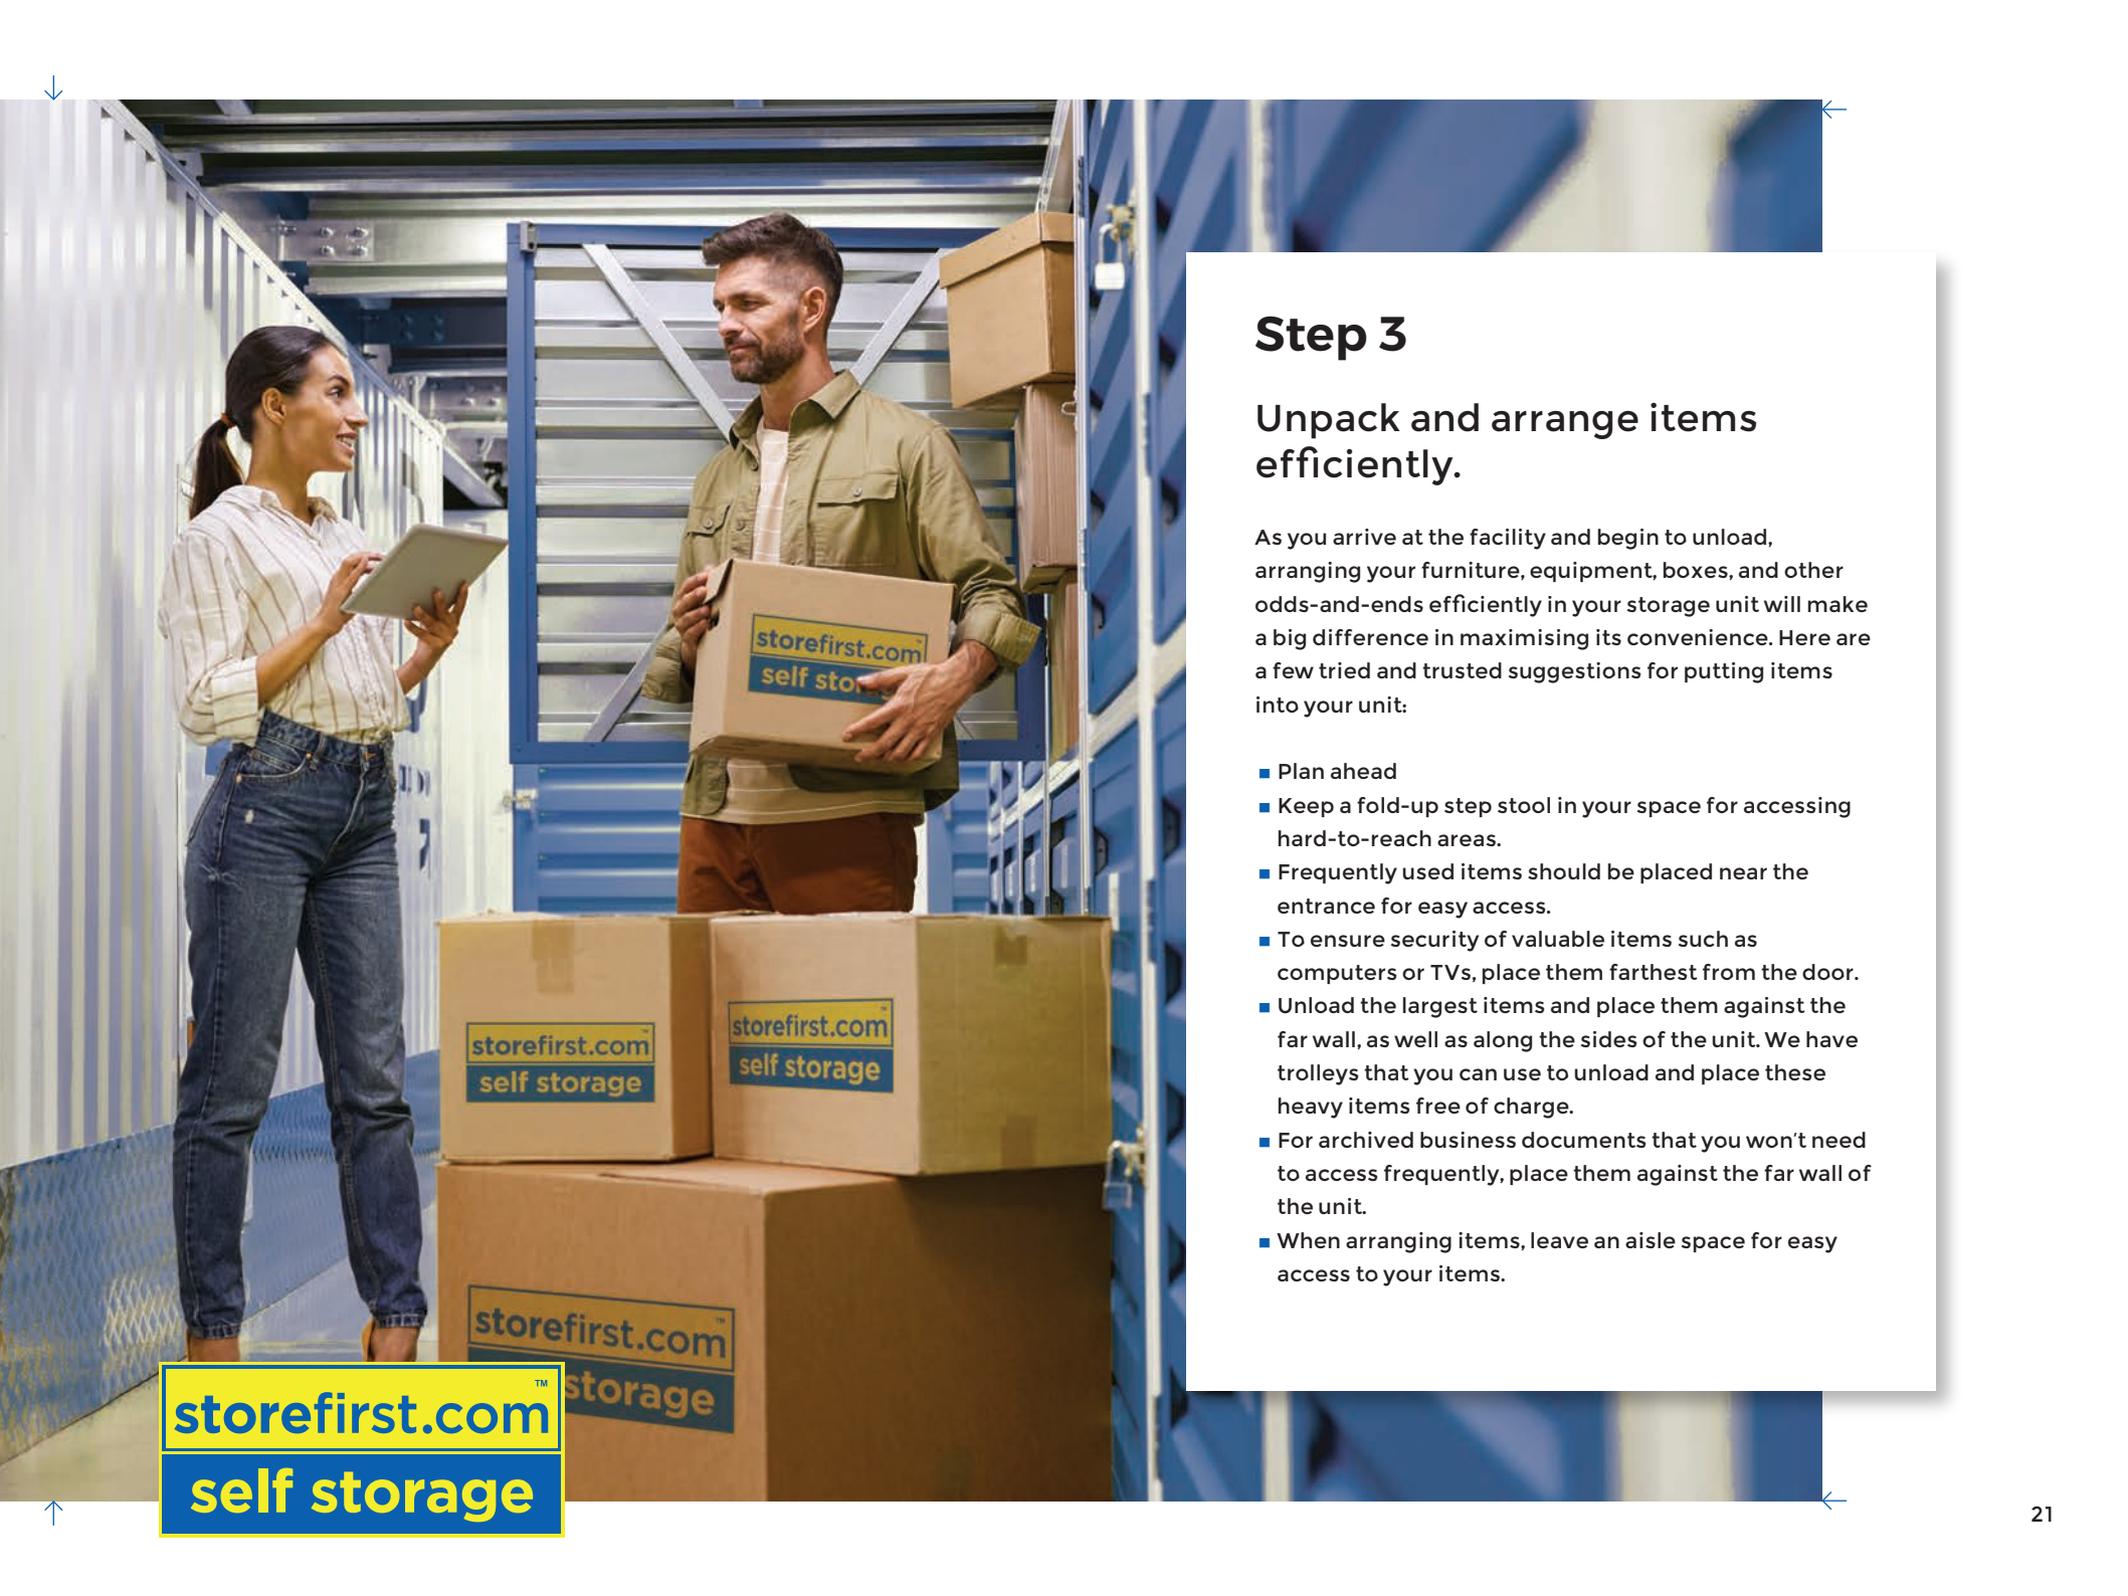

Step 2

Organise and pack your items with a plan in mind.

Organising and efficiently packing your items will take time and concentration. However, the up-front effort will be well worth it when you're able to easily unload and organise your items at the storage unit. Here are some tips for packing:

- Invest in supplies. A range of packaging materials are available in all of our stores or you can use your own.
- Invest in good quality, sturdy boxes and packing materials. Boxes should be sturdy enough to hold up for years under the weight of the stack. You can buy standard-sized boxes and speciality boxes for items such as TVs, etc. This can work out cheaper for you in the long run as you optimise your storage space and do not pay for space you don't really need.
- For wrapping breakables, paper will do, but bubble wrap can be used repeatedly, is cleaner, and because it is transparent, makes identifying contents easier.
- Most people end up needing more tape than they thought they would when packing. Our self storage staff can help you estimate how much tape you'll need.

self storage

Step 3

Unpack and arrange items efficiently.

As you arrive at the facility and begin to unload, arranging your furniture, equipment, boxes, and other odds-and-ends efficiently in your storage unit will make a big difference in maximising its convenience. Here are a few tried and trusted suggestions for putting items into your unit:

- Plan ahead
- Keep a fold-up step stool in your space for accessing hard-to-reach areas.
- Frequently used items should be placed near the entrance for easy access.
- To ensure security of valuable items such as computers or TVs, place them farthest from the door.
- Unload the largest items and place them against the far wall, as well as along the sides of the unit. We have trolleys that you can use to unload and place these heavy items free of charge.
- For archived business documents that you won't need to access frequently, place them against the far wall of the unit.
- When arranging items, leave an aisle space for easy access to your items.
